In 2006, Baszucki and Cassel launched Roblox Studio. It was, in Bronstein's own phrasing, an "immersive creation engine", blending gaming, creation, and social networking. Roblox might have the veneer of a video game, but it's perhaps more accurate to describe it as a set of tools its users can wield to build their own video games (or "experiences" as the company sometimes refer to them), to be hosted on the Roblox platform. These creation tools are designed to be less daunting to the entry-level developer than professional game engines, and fully customisable frameworks exist across numerous genres. These include maze-runners, first-person shooters, tycoon simulators, and free-form "roleplay" genre, where developers create worlds – schools, cities, historical eras, sci-fi dystopias, etc – for users to project their own stories onto, informed by their interactions with the setting and other users.

Equally, if you get caught using an account generated through these programs, there are big consequences. The official Roblox site strongly advises against using schemes like account generators. They say that anyone asking you to input your details anywhere is scamming you, and that you won't receive a glitched account or free Robux. The terms of service also warn against it, too. They say that you cannot obtain "exploited game or experience content." This includes hacked accounts with Robux. If you're caught doing this, they reserve the right to immediately close your account.

I think of a metaverse as a collection of virtual worlds, landscapes, and characters that you can experience in one shared space. One example is Fortnite, which lets players dress up as characters from a huge range of popular franchises across movies, other video games, and even sports. Roblox has a huge range of virtual worlds that you can go to and games to play that can take place in any kind of environment that a developer can imagine.
